EDUCATION

Carleton University

BSc Computer Science, Minor in Philosophy | Dean's List | GPA:3.9/4.0

Ottawa, ON

Sept 2018 – May 2023

EXPERIENCE

Amazon - AWS

Vancouver, BC

Software Engineer Intern

May 2022 - Aug 2022

- Led the migration of the Contact-Us page away from a monolith package onto its own standalone page
- Achieved **100%*** up time by adding latency based routing to determine which region is a better host for the customer
- Page built entirely in Native AWS using API Gateway + Lambda + S3 to reduce dependency on external resources
- Deployed a pipeline with approval workflows, bake times and integration tests at each stage resulting in safe deployment of code

Morgan Stanley

Montreal, QC

Software Engineer Intern

Jan 2022 - May 2022

- Designed and implemented an interactive **AngularJS** dashboard of over **1,000,000+** foreign exchange trades
- Reduced network calls **3x** by implementing caching on the browser side when making calls to the **SQL** database
- Added filters to explore for a specific or a set for trades cutting down the time taken to search for a trade by **83%**

Amazon - AWS

Vancouver, BC

Software Engineer Intern

May 2021 - Sept 2021

- Expedited **35+ hrs** of dev time by automating the process of updating newly launched AWS Regions & Ec2-Instances
- Developed a Lambda function to create a centralized location for information to be retrieved by other AWS services
- Implemented a S3 Caching Client onto the **Spring Framework** backend to reduce network calls to S3 by **95%**
- Created **4** new filter's using **ReactJS** on the Marketplace UI to save **80+** additional clicks for the users

MicroFocus

Ottawa, ON

Software Engineering Intern (8-month co-op)

Sep 2020 - May 2021

- Automated redundant test cases using **Java** to reduce build and release pipeline times by **25x**
- Collaborated with the Cloud team to automate the API test cases, increasing the CI pipeline flow from **62% to 87%**
- Modified existing API tests to run them in a sanity and regression test suite against cloud

Carleton University: School of Computer Science

Ottawa, ON

Teaching Assistant

Sept 2019 - Dec 2019

- Mentored **40+** students on the basics of Object-Oriented Programming in **Java**

PROJECTS

Charity Base [Node.js, React]

June 2020

- Built an application that provides the public information on the activities, locations, and finances of over **74,000+** charities registered in Canada
- Developed an interactive **React** front-end to aggregate real-time charity data

Home Surveillance System [Python, Tensorflow, Jupyter, Raspberry Pi]

June 2019

- Deployed an object-detection program to notify users of unrecognized personnel using a **Raspberry-Pi** and **Python**
- Trained a **TensorFlow R-CNN** model to detect known and unknown faces and implement the object detection application

AWARDS/CONFERENCES

Top 5 @ RBC Amplify Hackathon:	Oct. 2020	Canadian Undergraduate Tech Conference:	July. 2020
Michael Oliver Scholarship:	Jan. 2020	President's Scholarship @ CarletonU:	Sept. 2018
1st Place @ Heriot-Watt Hackathon:	Feb. 2018	2nd Place @ Middlesex Codejam:	May. 2018
